

Full Summer Cabin Solar Power System

suncatchersolar.com

Enjoy the use of lights, radio, TV, cell phone charger and laptop computer. Have the power to run your microwave, coffee maker, kettle, a small energy efficient fridge and many other small appliances with this powerful weekend system.

This system will supply your power for a few cloudy days, using the reserve in the batteries, if needed. The batteries will be recharged during sunny periods.

System Components

- 390 W Solar Panel Array
- 5.4 kWh Maintenance Free Battery Bank (4-12V batteries)
- 3000 W Sine Wave Inverter / Charger
- 30 A Charge controller with meters

Powerboard, Battery and Inverter Cables, DC Fuse, wiring, Manual

System output (kWh/year): 500

System output (kWh/day): 1.5

System Price

System price	\$7,495.00
Tax (GST and PST)	10.0%
Total Cost	\$8,244.50
